SCIENCE BEHIND THE TASTE

DEAR VISITOR,

We are glad to introduce you the history, the products and the wide-ranging activities of our company. Sanapulus Kft. is the sales & marketing company of the food supplement division of the PEZ International Group.

Together with the production capabilities of its affiliates, it is one of the leading food supplement contract manufacturers in Central

Eastern Europe. The activities are very complex from research & development, purchasing, production, logistic services and sales & marketing.

Most of the distributed products are made in the production company in Hungary. Thanks to the continuous growth, the division employs about 400 people and has a dominating

capacity in the region. We focus on the market and the needs of our commercial partners, furthermore, we offer market- or even customer specific products to all of our partners.

Our idea is not to sell what we have but manufacture what you need! With this mindset we achieved a turnover of 35 million euro within a relatively short period of time

since the start of this division in 2002. Keeping our goals in mind we are confident to keep the 2 digit growth also in the coming years.

We sell our products to 90 countries all over the world so far with the highest market share in Europe. We generate over 90% of our sales from export. Our aim is to launch every year additional markets and

increase our international market presence. Such as our activities, our commercial partners are also very diverse. We have FMCG and pharmaceutical distributors for our branded products in several countries, we work with numerous brand owner companies as their contract manufacturer and last but not least we produce different private label products for FMCG and pharmacy chains.

We hope our short introduction has aroused your interest and you will find the answer to all your questions in our catalogue.

We wish you a pleasant reading!

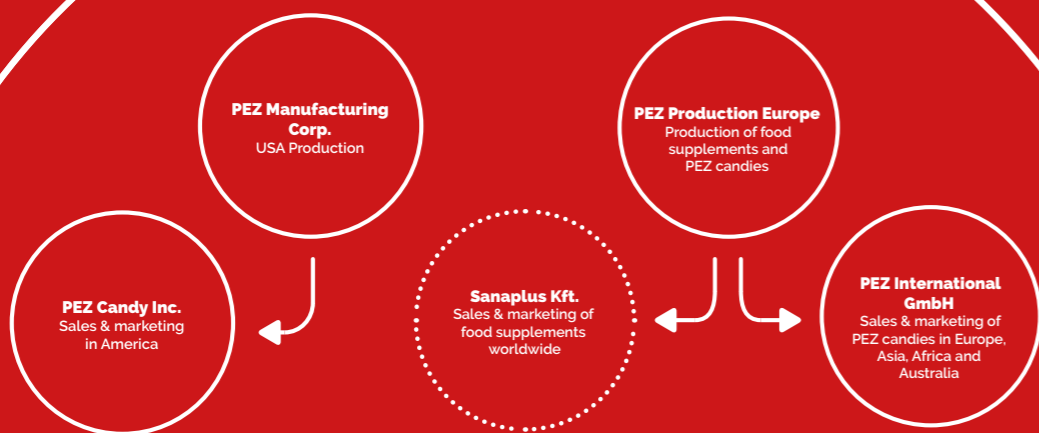

sana+

The management of Sanapulus Kft.

sana+

PEZ AG

Our mission is to make high quality food supplement products available for everyone around the world. In order to achieve this we always implement the latest technologies which guarantee the perfect quality and the most attractive price level.

MISSION

In the 90s there was a dominating effervescent tablet brand in Central Eastern Europe maintaining a by far leading market share. The history of our food supplement division started in 1999 when the management of the former PEZ Hungary Kft. started to develop effervescent tablets. A few years later we became market leaders on the local market. Based on this success the company started to introduce the products on the most successful export markets of the

mother company. The feedback was very positive and this was the reason why the first Sanapplus Kft. was launched at the end of 2004.

As a new and independent legal entity, sana+ actively started to expand its business internationally. Effervescent tablets were still the flagship products but a whole new product category was developed in the next years. The company today produces a wide product portfolio of tablets with or without

film coating, chewable tablets, dextrose tablets, sticks, vitamin gummies multivitamin lollypops and drink powders.

By 2008 the nicely performing Sanapplus Kft. with its nearly 50 export markets together with PEZ Hungary Kft. outgrew their production site. As a major step in our history, the two companies have merged and created a new legal entity called PEZ Production Europe Kft. and built a brand new

production site according to the highest European standards. This is where the operation takes place since 1st of January, 2009.

Till 2016 the food supplement division of PEZ Production Europe Kft. – the former Sanapplus Kft. – due to its continuous growth became a strategic player within the company structure so the management saw the necessity to relaunch Sanapplus Kft. as an independent organisation again.

The major difference is that PEZ Production Europe Kft. kept the production for both the food supplements and the candies. This way the synergies can be utilized and both divisions have the possibility to offer very attractive prices on the market. The sales & marketing of the food supplement division is exclusively carried out by Sanapplus Kft.

Today we are market leaders in most of the Central European

countries and we produce many major Western European brands and private label items of the biggest chains across Europe. Our products are widely distributed in the Middle East and the number of distribution partners is increasing also in the USA and in the Far East.

We look forward to welcoming you as our next satisfied partner!

MULTIVITAMIN+Ca FOR KIDS

Premium effervescent tablets

INDEPENDENTLY FROM GENDER, AGE OR LIFESTYLE

When we developed the premium series from the sana+ effervescent tablets, our idea was to create a best seller range on the market. Therefore we have carefully chosen the finest flavours, sweeteners that make the best sweetness character and the highest quality ingredients in general. Our objective was also to avoid the use of artificial raw materials that are useful for tablet production from a technical perspective. In case of the active ingredients we didn't want to invent too sophisticated items. The focus was simply to have a range which is popular among all consumers and all people can take independently from gender, age or lifestyle. Even if you look for an effective everyday supplement which is healthy due to the fact that all active ingredients are already dissolved or you just want to have a refreshing fruity drink with some benefits, this is your choice. If you choose our premium series, you will definitely be satisfied!

PREMIUM

MULTIVITAMIN REGULAR

- + Vitamin B1, Vitamin B2, Vitamin B6, Vitamin B12, Vitamin C, pantothenic acid, nicotinamide and biotin contribute to normal energy-yielding metabolism
- + Vitamin B12, Vitamin C and folic acid contribute to the normal function of the immune system

Sugarfree effervescent tablets
WITHOUT ANY SUGAR OR ARTIFICIAL SWEETENER

How much sugar does a standard effervescent tablet contain? Well, not much. You get significantly more from a coke or even a fruit juice. But there are consumers whose target is zero sugar intake. We thought about them when we brought our sugarfree series effervescent tablets to life. Besides completely removing sugar from the composition, we also avoided the use of the common artificial sweeteners. With the purest stevia leaf extract you can feel a full bodied sweetness while you actually have not taken any sugar or sweetener. This is the best solution which we can offer to our most health conscious customers. If you are looking for the highest quality on the market, ask for the sana+ sugarfree series effervescent tablets!

DEXTROSE

Dextrose roll IF YOU WANT TO REFUEL

The sana+ dextrose rolls look like nice tasting snack tablets. Well, they certainly are nice tasting but let's take a closer look! Glucose is the type of carb that has the quickest absorption from the stomach and works as the highest energy source for the cells. Take them with you, if you want to refuel during doing sports, working, driving or learning!

ALL FLAVOURS

Active ingredients per roll

Vitamin C	15 mg
